

EZproxy software

EZproxy software allows you to read e-books and search for information in the databases subscribed by the ŠVK by connecting from computers at home.

EZproxy software

Šiaulių valstybinė kolegija academic community members can log in and read subscribed e-books, search for information in subscribed and tested databases:

1. *from the institution's internet network;*
2. *from your home network (via EZProxy).*

1. Searching for information from the institution's network

You can access all electronic information resources by visiting <https://svako.lt/lt> > students > library > electronic information resources > e-books or databases > selecting the appropriate e-book collection or a desired database and opening the link.

2. Finding information from your home network (via EZProxy)

All electronic information resources can be accessed at <https://login.ezproxy.svako.lt/menu> or at <https://svako.lt/lt> > library > electronic information resources > EZproxy software.

Access is granted after entering personal SVAKO ID correctly
